Transland Valves Feature

- ✓ ***Stainless Steel or Cast Aluminum***
- ✓ ***Hard Chrome Plated Brass or Stainless Steel Balls***
- ✓ ***Teflon Seals***
- ✓ ***Viton O-Rings***
- ✓ ***Service Kits for all models.***

Transland Spray Valves are three way ball spray valves for pilot control of the spray system. In the off position, the liquid is re-circulated to the hopper. At the same time the venturi in the re-circulating port is connected to the discharge port of the valve which applies negative pressure on the boom to reduce pressure on the nozzles and eliminate trailing.

Transland offers a full line of valves.
